02. Times Square Off

Full story and 100% mission walkthrough

True Believer target: 170,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level’s comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide’s route, not a separate numbering system shown by the game.

Free Play characters and abilities: Keep Captain America and Mister Fantastic for the story puzzles. Add Iron Man Mark 42 (flight, explosives and heat), Thor (electricity), Wolverine (digging), Magneto (blue metal), Galactus (cosmic bricks), Venom (symbiote pools), Jean Grey (telekinesis), Hulk (strength) and Iceman (fire extinguishing).

Route warning: Collect both laboratory minikits before leaving. Start the greenhouse challenge on the first roofs and finish it before the separate Daily Bugle rooftop section.

Reaching True Believer

This has the highest target in the main campaign. Clear the Baxter lab, every roof terrace and the street arena. The greenhouse and garden detours provide useful extra studs; avoid rushing straight from rooftop to rooftop.

You need 170,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 85,000 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Captain America, Mister Fantastic and, later, Spider-Man

Goal: Pursue Doctor Octopus from the Baxter Building to Times Square.

1. Get into the Baxter Building

Follow the guide studs off the Helicarrier and descend into the park. Smash the lamp near the locked gate, build a grate and send Mister Fantastic through it. Outside, break the satellite equipment and build a Fantastic Four pad. Reed's transformation opens the gate for Captain America.

Use Cap's shield on the building's shield switch to lower a ladder. Reed climbs it and glides across the gap from the marked ledge. Operate the computer. When the security lasers activate, bring Cap

onto the shield pad at street level, raise his shield and redirect the beam into the equipment above the entrance. Enter once the door opens.

A shield switch and a shield pad perform different jobs. Throw the shield into a switch; stand on a pad with the shield raised to aim a continuous reflected beam. Confusing these two interactions can make a working puzzle appear unresponsive.

2. Escape the laboratory

Fight the octobots, then build the Fantastic Four pad near the small lift. Reed becomes a screwdriver and exposes a shield switch. Activate it with Cap and ride up. When Doctor Octopus starts a fire, Cap crosses with his shield raised; Reed reaches the other side through the grate assembled from the dropped bricks.

Reed pulls the wall handle. Build its debris into another shield switch and activate it. Climb to the computer with Reed and connect the power coupling. Step onto the red floor pad to run the laser, leaving Reed there while switching to Cap.

Build the shield pad in the middle of the lab. Reflect the beam into both blue receivers at the back, holding it on each until fully charged. Board the Fantastivator that rises from the floor. The opening is a chain of dependencies: expose the switch, connect the power, hold the pressure pad, and finally charge both receivers.

3. Cross the first rooftops

Glide Reed across the first gap. Pull the wall attachment, build the ladder and climb into the small office. Break the objects inside, build a turntable handle and push it to rotate the satellite dish. Cap can now cross using the acrobatic poles. His next shield switch stops the fans blocking Reed's grate route.

Reunite above the fans, break the blue pipes and build another Fantastic Four pad. Reed's pump transformation bursts the water tower. Build a zip line from the wreckage and cross. If Doctor Octopus grabs one hero, switch to the free hero and hit him to release your partner.

Follow him upward. Target both supports of the HOTEL sign with Cap's shield to drop it across the next gap. Beyond it, lower the ladder, enter the broken-window section and cross the fire with Cap's shield raised. Wall-jump upward, break the blue rooftop object and build a shield switch to activate Reed's lift.

4. Reach and pass the Daily Bugle

Use Reed's stretch attachment to reach the lift and ride up. Glide to the next building and build the zip line that brings Cap across. Hit Doctor Octopus with Cap's shield when he waits by the Daily Bugle sign. Send Reed through the nearby grate, pull down the bugle decoration, then assemble its pieces into a Fantastic Four pad. Reed's wrecking-ball transformation drives the chase onward.

Spider-Man now joins. Pull the tower down to form a bridge, cross, and use Spider-Sense to reveal a climbable wall. At the top, reveal and pull the hidden handles to start the fans for the other heroes. Build and operate the nearby control panel to open the next gate.

In the garden, use Reed's Fantastic Four pad to launch his rocket transformation into the billboard. Spider-Man can then pull the billboard down into a bridge. Cross and follow the wrecked passage to street level.

5. Defeat Doctor Octopus

This battle rewards patient dodging. Stay mobile while Doc Ock attacks and look for a tentacle that becomes lodged in the ground. Approach the indicated interaction point and attack to remove that arm. Repeat until you have destroyed three arms; then approach and land the final ordinary hit.

Do not stand beside him trading blows while all his arms are free. Make him commit to an attack, move out of its path and use the brief recovery. Spider-Man's mobility is useful, but the vulnerable-arm interaction does not require a particular hero. If a character is caught, switch to someone who is still free.

The mission finishes after the fight and the ensuing cosmic-brick cutscene. You do not need to solve the optional street puzzles to complete the level.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Baxter lab: magnetic vault

At the back of the starting laboratory, beneath the circular platform, find the blue-metal vault wheel. Use Magneto on it to open the compartment and take the minikit.

Minikit 2: Baxter lab: powered compartment

On the far right, destroy the silver panel beneath the large Fantastic Four emblem with Iron Man’s missiles. Charge the generator behind it with Thor, then collect the minikit from the opened compartment.

Minikit 3: First roof: cosmic rocket

On reaching the roof, drop to the lower ledge at the front-left and smash the crates. Dig the exposed patch with Wolverine. Use Galactus on the black cosmic pieces to assemble a rocket; its launch leaves the minikit behind.

Minikit 4: Rooftops: five greenhouses

Strike each small glass planter so its plants grow. Find the first beneath the satellite dish, the second on the lower roof near the water tank, and the third opposite the HOTEL sign. The remaining two are on opposite sides of the rooftop reached above Cap’s wall-jump shaft.

Minikit 5: HOTEL roof: symbiote passage

Near the HOTEL sign and Doc Ock’s rooftop stop, missile the silver vent. Switch to Venom and interact with the black symbiote puddle it exposes. The passage carries him into the greenhouse containing the minikit.

Stan Lee in Peril

On the later rooftops, before the garden and Spider-Man billboard, fly up to the water tank on the taller building. Missile its silver fittings, build the loose parts into a pipe and turn the purple valve with Jean Grey. The tank bursts and frees Stan.

Minikit 6: Garden roof: lawn mower

Before pulling down the huge Spider-Man billboard, destroy the silver garden furniture by the grass. Build the pump and jump on it repeatedly until a Fantastic Four pad inflates. Use Mister Fantastic on the pad to mow the lawn and reveal the minikit.

Minikit 7: Garden roof: barbecue

Beside the grassy terrace, melt the gold canister next to the barbecue with Mark 42. The explosion leaves the minikit in fire. Extinguish the flames with Iceman, or use a suitable fire-resistant character, and collect it.

Minikit 8: Times Square: police van

During the Doc Ock encounter, move to the left side of the street. Use Hulk to pull apart the green-handled police van and collect the minikit inside. Do this before the final boss hit.

Minikit 9: Times Square: cracked road

At the far-right/back-right corner of the arena, explode the silver car. Switch to Hulk and ground-pound the cracked pavement underneath. Collect the minikit from the hole.

Minikit 10: Times Square: five hydrants

Use a heat beam on the five gold-topped hydrants. Sweep the left side near the steps, the rear-left corner, the rear-right corner, the middle-right pavement and the far-right edge. Check the counter after each; the fifth awards the final minikit.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 170,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu’s exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
