04. Rock Up at the Lock Up

Full story and 100% mission walkthrough

True Believer target: 150,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Iron Man Mark 42 (flight, missiles, heat and consoles), Hulk (story strength), Wolverine (story claws and senses), Magneto (metal), Spider-Man (webs and senses), Mister Fantastic (grates), Thor (electricity), Iceman (freezing) and Sandman (sand panels).

Route warning: The five life rings are all outside. Rescue Stan on the upper exterior walkway before entering the cell block. The last minikit becomes accessible only after the arena lift opens.

Reaching True Believer

Break containers on the dock and upper prison walkways, then clear the cells and guard towers. Use flight to collect studs on ledges. Finish the arena detours before Abomination's last hit, which ends the mission.

You need 150,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 75,000 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Iron Man, Hulk and Wolverine; Hulk and Wolverine finish the mission

Goal: Enter the Raft, find the escaped villains and stop Sabretooth and Abomination.

1. Take the ferry to the Raft

Follow the blue guide studs to the ferry port. Iron Man can fly there. Destroy the silver container weighing down the ferry, then speak to its captain. He needs a ticket before the trip can begin.

Follow the nearby marker to the open storage area, assemble the ticket machine and collect its ticket. Return to the captain, board the ferry and travel to the prison. At the entrance, Hulk pulls the green handles; Iron Man then explodes the silver controls behind them.

Wolverine joins for the actual level. His senses reveal hidden climbing walls and weak points, his claws operate special switches, and marked dirt piles can be excavated. He is often the character who finds a route before Hulk or Iron Man can finish it.

2. Reach the main prison door

Follow the exterior path until the bridge collapses. Fly Iron Man across, build the turntable and push it to restore the bridge. Bring the others over. Wolverine digs at the marked spot; build the green handles and let Hulk tear open the wall.

Wolverine's senses expose the climbing route beside the lift. Climb, break the clutter and activate the claw switch in the right corner. Put Hulk on the lift's red pad. When the alarm activates, destroy all four silver turrets with Iron Man to remove the laser barriers.

Pull the next heavy gate with Hulk. Wolverine reveals another climbing wall, climbs to the ladder and breaks the yellow-cracked panel above. Iron Man operates the exposed console: select all four door locks to open the main entrance. Fight through and smash the cracked wall inside to reach the next section. The enemies outside are less important than the four turrets and door controls; do not wait for a permanently quiet courtyard.

3. Work through the cell block

The Leader protects himself with floating debris. Missile the silver objects with Iron Man to collapse his shield. If he immobilises one hero, switch to another and hit him.

Head right. Wolverine reveals and breaks a cracked wall, reveals the climbing route inside and uses the upper claw switch. In the next section, smash the objects on the right, build a console and operate it with Iron Man to disrupt Whiplash's electrical trap.

Use Wolverine's senses beneath Abomination's cell to reveal green handles. Hulk pulls away the platform. Send Iron Man upward to destroy the silver door chains and the objects in the opened room; build the claw switch. Wolverine climbs the chain and revealed wall to reach it, opening the security room below.

At the security console, examine the question-mark locations to locate the villains and unlock the onward route. Once Magneto strips Iron Man's armour, the mission continues with Hulk and Wolverine. Do not search for an Iron Man interaction after that cutscene.

4. Knock Sabretooth off his platforms

On the lift, defeat each wave of inmates before trying to hurt Sabretooth. When Magneto stops the lift and raises him on a platform, loose pieces appear. Wolverine builds the green-handled object; Hulk lifts it, aims at Sabretooth and throws.

Repeat after the next wave. The final round supplies two throwable builds because Sabretooth moves from one platform to another. Build and throw both objects to finish that encounter. A miss does not mean the whole level must be restarted; watch for replacement pieces or another opportunity to throw.

This is a build-and-throw battle, so keep Wolverine near the loose bricks and switch to Hulk only after the object is complete. Throwing ordinary scenery before the enemy wave is cleared will not replace the scripted attack.

5. Use the spotlights against Abomination

Wolverine must reach the searchlights while Hulk handles the actual punches. There are two lower access routes: a dig spot that produces a ladder and a sensed cracked section on the right that releases pieces for a tyre trampoline. Use the available route to climb toward a spotlight; the right-hand route also involves wall-jumping, while the ladder route uses Wolverine's climbing ability and a claw switch.

Operate a spotlight and hold its beam on Abomination until he is blinded. Switch to Hulk when prompted and complete the combat-button sequence. Sabretooth's helicopter destroys that spotlight, so move to the other route and repeat the light-then-punch cycle.

For the final spotlight, climb back to the opened lift, ride up and cross the acrobatic poles. Defeat the guards, break the objects and operate the claw-switch mechanism in the room. Aim the final light at Abomination and complete Hulk's last prompted fight to finish the mission.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Dock: blue sewer bars

At the start, look left for the large blue-metal grate over the water. Magneto pulls off the bars. Fly into the opening to collect the minikit; do not jump into the sea with a ground-only character.

Minikit 2: Waterfront: ice fishing

After crossing the bridge, drop to the lower waterfront beside the spotlight, below the lift. Pull the vent’s grapple handle with Spider-Man. Freeze the spilled water with Iceman and let the ice fishing-rod animation retrieve the minikit.

Minikit 3: Offshore boat

Fly right over the water to the small boat carrying a silver object. Destroy that object with missiles. Wait for the shark animation and collect the resulting minikit.

Minikit 4: Exterior: five life rings

Break the ring hidden by the starting crates, the one beside the bridge, and the one on the far-right waterside ledge below the lift. Above the Hulk lift, find another just left of the landing and the last farther left beyond the gate. Check for five registered hits.

Stan Lee in Peril

Above the exterior Hulk lift, head to the far-left end of the walkway. Use Mister Fantastic’s grate to enter Stan’s room. Use Spider-Man’s senses if needed, then pull both web handles to remove the obstruction trapping him. This is a Free Play rescue.

Minikit 5: Cells: neighbouring prisoner room

To the left of Abomination's cell, use Magneto to open the blue bars of the neighbouring cell. Smash the bed and assemble a grate. Send Mister Fantastic through it to reach the otherwise inaccessible minikit cell.

Minikit 6: Cells: nested metal bins

Move to the right of Abomination's enclosure. Use Magneto on the blue-metal bin, then on the smaller bin that appears, then again on the next one. Continue until the minikit is released.

Minikit 7: Above Abomination's cell

Pull the pair of web handles above the enclosure with Spider-Man. This uncovers a gold wall. Use Mark 42's cutting beam around its outline, then collect the minikit behind it.

Minikit 8: Security console: bonus maze

After finding Sabretooth with the surveillance console and opening the lift, inspect the console area again with super senses. Build the revealed electrical unit and charge it with Thor. Reuse the console and select the minikit icon. If the screen shows static, move the cursor and allow the bonus interaction to finish.

Minikit 9: Arena: three toy helicopters

Complete three side puzzles during Abomination's fight. On the right, melt the gold crate and use Sandman's panel. Near the starting side/left truck, explode silver pallets, dig the exposed patch with Wolverine, build the blue box and operate its switch. On the high left spotlight platform, open the little room and operate the switch for the third toy.

Minikit 10: Arena: lift shaft

Continue the boss encounter until prisoners emerge from the lift on the right. Enter the now-open shaft and fly to its top. Collect the minikit before delivering the final attack on Abomination.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 150,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
