05. Rebooted, Resuited

Full story and 100% mission walkthrough

True Believer target: 145,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Keep Captain America and the story Iron Man suits. For Free Play use Mark 42 for flight and heat, Jean Grey for mind control and telekinesis, Spider-Man for web handles, Magneto for metal, Thor for electricity, Hulk for green handles, Iceman for freezing and Sandman for Stan's rescue.

Route warning: Complete both garage puzzles before using the two-person lift. Track all five gold hologram projectors through the middle section. The rooftop spotlights require access to the upper platform during the later fight.

Reaching True Believer

Search the garage and side rooms, then the balcony and JARVIS chamber. The roof contains many destructible objects, but collect their studs between attacks.

You need 145,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 72,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Captain America and Tony Stark, who acquires Mark 1 and Mark 42 armour

Goal: Retake Stark Tower, restore JARVIS and defeat Killian and Mandarin.

1. Enter Stark Tower

Tony has lost his armour, so follow the city guide route on foot or in a vehicle. At Stark Tower, target the A in the STARK sign with Cap's shield to expose the shield switch, then activate it. Tony uses the nearby computer to rotate the circuit pieces into a connected power route and open the entrance.

Inside, remember that Tony's available abilities change during the mission. He begins as a computer user without flight or missiles. Mark 1 restores explosives but still cannot fly. Mark 42

supplies the heat beam needed for gold objects near the end. Do not attempt the later gold-object puzzles with his earlier equipment.

2. Recover the Mark 1 suit

Throw Cap's shield at the cover above the garage bay, then into the exposed switch. Break the equipment inside and build a console. Tony uses it to deactivate the three power readings. The corridor's barriers now cycle rather than staying permanently off; cross during the gaps.

At the far end, stand Cap on the shield pad and reflect the laser back into its cannon. Build the wreckage into another console. Tony now controls a flying key-card drone: raise it through the narrow opening near the top of the glass, steer right and land on the marked pad beside the armour room.

Enter the suit station to acquire Mark 1. Use its missiles on the silver cage over the next bay, then have Cap activate the exposed shield switch. Defeat the enemies inside and put both characters on the lift's red pads to continue. If the drone appears trapped, gain height and look for the horizontal slot rather than trying to fly through the glass.

3. Cross the tower's broken systems

In the next room, activate the switch and use Tony's console to move the platform that carries Cap across the gap. Cap walks through the fire with his shield raised and destroys the control equipment blocking the route. In co-op, the second player must board the platform before it moves back.

Explode the silver clamps on the next doorway. Cap swings across the poles, enters the upper room and grabs the lever to activate an air lift for Mark 1. On the next fan shaft, destroy the silver plate to shut the airflow down and descend.

Continue right, defeat the enemies and missile the next silver doorway clamps. Cap wall-jumps up the shaft, exits onto the left walkway and pushes the turntable. Mark 1 can now destroy the exposed silver circuitry. Cap then reflects the activated beams into the two blue receivers beside the large door until both are charged.

4. Reboot JARVIS and upgrade

Advance through the opened door with Cap's shield raised. From the shield pad, return the corridor cannon's beam to its source. Assemble its wreckage into the two door levers and have one hero hang from each simultaneously.

Inside JARVIS's room, defeat the enemies and activate the two shield switches. Stand Cap on the shield pad and direct the laser into the unpowered receiver to restore the system. Bring Tony onto the central suit platform to acquire Mark 42.

Use the new heat beam to trace the outline on the golden wall and open the way to the rooftop lift. This is a cutting interaction: hold the beam on the marked gold outline until the cut completes. A quick missile volley will not open it. Before leaving, check that both characters are through the door and that the new armour animation has completed.

5. Defeat Killian, then Mandarin

Fight the initial attackers. When Mandarin mind-controls one hero, switch to the free partner and strike Mandarin to interrupt him. Then attack Killian during the opening. Complete this cycle three times.

Mandarin next occupies the large armour. Clear the displayed wave of 40 enemies while avoiding its missiles. Once the armour becomes vulnerable, attack with Iron Man's ranged weapons. JARVIS sends additional suits into the fight. When Mandarin becomes protected again near defeat, look for the wreckage left by those suits.

Build the EMP device from the pieces and activate its shield switch with Cap. The blast disables Mandarin's armour and exposes a golden plate on its back. Switch to Mark 42 and melt that plate with the heat beam to finish the level. The last sliver of health is a puzzle phase; ordinary missiles cannot complete it.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Garage: repair the hot rod

Mind-control the civilian behind the right-hand glass and use his lever to open the garage. Jean Grey fits the two wheels using telekinesis; Magneto places the metal engine. Drive the repaired car along the stud trail to the left to earn the minikit.

Minikit 2: Garage: cabinet generator

At the far-right L-shaped bank of cabinets, pull the web handles with Spider-Man and dismantle the purple drawers with Jean Grey. Build the combined pieces into a transformer. Charge it with Thor and collect the minikit.

Stan Lee in Peril

At the start of the second section, go down the steps towards the near-left edge. Stan is hanging above a sand panel. Use Sandman there to form a trampoline and let Stan drop to safety. Do this before advancing deep into the tower.

Minikit 3: Tower: exterior JARVIS balcony

In the second section, reach the room with balcony access and fly outside to the right. Rise to the upper ledge beside/behind the large red JARVIS head. The minikit is floating there; no extra switch is needed.

Minikit 4: Tower: green-handled door

In the next main room, before JARVIS’s core, reach the elevated platform near the white-and-blue wall-jump shaft. Hulk pulls off the green-handled door. Enter the exposed room and take the minikit.

Minikit 5: Tower: jukebox room

From that area, ascend the right-hand shaft into the upper side room. Pull its web attachments and dismantle the purple shelves with telekinesis. Build the pieces into a jukebox and wait for the disco animation to release the minikit.

Minikit 6: Tower: five gold projectors

Melt the gold hologram bases in these five places: the lower balcony-access room; the upper jukebox room; the side room right of the twin-laser door; the laser corridor approaching JARVIS; and the back-right of JARVIS's core room. Complete this set before taking the rooftop lift.

Minikit 7: Roof: ice block

At the back/right of the rooftop arena, find the shallow puddle. Freeze it with Iceman, then melt the resulting block with Mark 42. Collect the minikit and return to a safe space away from the boss attacks.

Minikit 8: Roof: outer ledge

Fly along the left edge of the roof to the isolated ledge/pylon with a visible minikit. Fly through it and return to the arena. Do not attempt a ground jump over the drop.

Minikit 9: Roof: doorbell

Find the small rear door beneath the upper walkway, on the left side. Use Jean Grey's telekinesis on its bell/door mechanism. Enter when the door opens and take the minikit.

Minikit 10: Roof: three spotlights

Advance until the later Mandarin fight opens access to the upper rooftop platform. Fly up and use Magneto on all three blue-metal spotlights along the railing. Collect their reward before melting the final gold plate on Mandarin's armour.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 145,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
