06. Red Head Detention

Full story and 100% mission walkthrough

True Believer target: 95,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Keep Black Widow, Hawkeye, Human Torch and Captain America for their story tasks. Add Magneto for the blue vent, Iceman for freezing and extinguishing, Thor for electricity, Spider-Man for paired web handles, Wolverine for claw switches and Mister Fantastic for grate travel. Human Torch supplies flight and heat.

Route warning: Shoot all three black spiders before leaving the entrance area. Finish the five gold Hydra objects and Stan's rescue before moving out of the foundry.

Reaching True Believer

Collect the foundry's side-platform studs while hunting the gold Hydra objects. Break crates in the missile room and sweep the portal room's corners. Use flight to avoid repeated falls from the machinery.

You need 95,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 47,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Black Widow and Hawkeye, joined by Human Torch; Captain America joins for Red Skull

Goal: Find the stolen arc reactor, infiltrate the HYDRA base and defeat Red Skull.

1. Locate the hidden entrance

Leave the Helicarrier and follow the first tracking marker into Manhattan. Use Widow's cloak to pass the security scanner and operate the control inside the small building. The initial lead proves false, so follow the new marker toward the Empire State Building area.

At the marked storefront, Hawkeye shoots the attachment on the sign and pulls it down. Shoot the exposed arrow socket and build the trampoline from the fallen pieces. Bounce up and grab the arrow pole; the sign rotates and reveals the underground entrance.

This transition introduces the recurring division of work: Widow handles security and computers, Hawkeye supplies ropes, explosives and arrow poles, and Human Torch later burns through gold. Keep an eye on the material of each obstacle so you do not spend time attacking it with the wrong ability.

2. Disable the entry security

Cloak Widow before entering the scanner's view. Ride the lift, wall-jump to the top and destroy the controls and power equipment. Hawkeye can then use the same lift without being rejected by the cameras.

Build the lever beside the rotating mechanism. Leave one character hanging from it while Hawkeye targets the exposed silver machinery with an explosive arrow. Once the wheel stops, cross to the right.

Break the crates beside the circular doorway and assemble the computer. Use Widow to rotate the circuit sections until the power path connects. Open the door and continue. If the wheel's silver part is not targetable, the lever must remain held; the exposure is part of a two-character interaction rather than a permanent change.

3. Build a bridge through the control room

Human Torch joins in the large furnace room. Fight off the guards and cut through the gold wall near the back. At the revealed console, rotate the mirrors so the beam reproduces each displayed shape. Completing the sequence moves the mechanism into place and creates the bridge overhead.

Cross to the lift, activate its lever and ride up. Cloak Widow into the guarded control room, then destroy the generators so the other characters can follow. Hawkeye shoots a rope attachment through the opened side passage.

Move Hawkeye onto the hanging rope of the large gear mechanism. Widow operates the nearby controls to rotate the gear and carry him across. From the far walkway, he pulls another attachment and grabs the exposed lever. This reveals a golden sphere. Human Torch melts it; Hawkeye shoots the newly exposed arrow socket to extend the acrobatic route.

Use Widow to cross, cloak past the cannon and ride a tooth of the large cog across the remaining gap. Pull the far lever to shut down security. Hawkeye then pulls open the exit door on the right.

4. Cross the missile room

Cut through the gold wall with Human Torch and climb the ladder. After clearing the guards, Hawkeye destroys the silver machine to produce the parts for wall-jump panels. Build them and send Widow upward.

Keep her cloaked as she passes the two large cannons. Follow the walkway around to the console and use it to turn the weapons against each other. At the exit, the guards' gold armour resists normal attacks. Melt the armour with Human Torch before finishing the enemies and moving through.

5. Defeat Red Skull

Captain America takes over alongside Human Torch. Approach Red Skull with Cap's shield raised to block his gunfire, then attack at close range. He retreats and activates a pair of cannons.

On one side, assemble and activate the shield switch. On the other, pull the lever. Each exposes a gold panel. Human Torch cuts through those panels and destroys the fuel or power components behind them, disabling both cannons. Red Skull returns to the floor; block his shots with Cap and hit him again.

The final phase activates the remaining pair of cannons. Repeat the switch-or-lever, gold-panel and exposed-power-supply sequence on the opposite positions. After both weapons are down, make one more shielded approach with Cap and land the final blow.

The regular enemies continue to interfere, but they are not the main objective once the cannon mechanisms are available. Clear a small working space, perform the interaction and move to the next side.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area's detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge's reward may appear later than another numbered minikit.

Minikit 1: Entrance: three hanging spiders

Shoot the spider beside the first security cameras, the one on the upper walkway by the white-and-blue wall-jump section, and the one just right of the large exit door. They hang on thin webs and blend into the dark background.

Minikit 2: Entrance: blue ventilation fan

Reach the platform above the security controls by wall-jumping or flying. Use Magneto on the blue-metal ventilation unit. Open or dismantle it completely to release the minikit.

Minikit 3: Entrance: ice puzzle

Before the large exit, look left for a puddle. Freeze it with Iceman and then use Human Torch's heat beam to melt the resulting block. Take the minikit before entering the foundry.

Minikit 4: Foundry: five gold Hydra objects

Melt all five: the one to the left near the entrance; the far-right platform opposite the gold wall; the upper-right position beside that wall; the high-left position near Stan's machine; and the right-hand podium near the laser machinery. Fly around the room's outer platforms to check each.

Stan Lee in Peril

In the foundry, fly high along the left wall. Stan is held between two rotating round machines. Destroy both wheels to free him. Human Torch can reach this location in Story Mode, so no extra Free Play power is needed for this rescue.

Minikit 5: Foundry: powered cogwheel

Follow the route right from the entrance to the electrical unit beside the large gear. Charge it with Thor. Wait while the gear turns and carries the minikit into reach, then fly or jump to collect it.

Minikit 6: Foundry: beneath the machinery

Near the machinery used by Hawkeye, descend to the small alcove beneath a horizontal rotating gear. Put out the flames with Iceman and walk into the recess to pick up the minikit. Do not mistake it for the onward platform route.

Minikit 7: Missile room: far-right hatch

In the next room, fly to the far-right side. Use Spider-Man on the two red web attachments and pull the panel away. Enter the revealed recess and take the minikit.

Minikit 8: Missile room: upper claw switch

Fly to the ledge above the exit, beneath the large Hydra emblem. Smash the obstructions and use Wolverine on the claw switch at the right of the ledge. Collect the released minikit before leaving.

Minikit 9: Portal room: four flags

During Red Skull's battle, destroy the flags in all four corners: near-left, near-right, rear-left and rear-right. Aim at the flags themselves, not just the enemies underneath. The fourth destroyed flag gives the minikit.

Minikit 10: Portal room: control booth

Use Mister Fantastic on the grate along the right wall of the final room. Follow the passage into the control booth behind the arena and collect the minikit. Return through the grate if the booth does not have a normal exit.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 95,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
