07. Bifrosty Reception

Full story and 100% mission walkthrough

True Believer target: 95,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Thor, Captain America, Human Torch and Wolverine cover the story. Add Spider-Man for web handles, Magneto for the blue statue, Iron Man for silver explosives, Jean Grey for telekinesis and Hulk for green handles. Keep a flying character available for the side temple.

Route warning: The first minikit is in the opening flight and cannot be reached by walking back. Collect it before committing to the rest of a clean-up run. Finish the city side-temple puzzle before entering Loki's final arena.

Reaching True Believer

Steer through the stud rings in the opening tunnel, then collect the observatory's breakables and the city's upper ledges. Melt the optional gold objects while gathering minikits. The tunnel reward is easy to miss if you start moving only at its very end.

You need 95,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 47,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Thor, Captain America, Human Torch and Wolverine

Goal: Pursue Loki through Asgard and defeat him and the Destroyer.

1. Travel to Asgard

Follow the city marker to the waterfront near Fisk Tower, where Thor opens the way to Asgard. Human Torch's flight makes the journey across Manhattan straightforward. During the Bifrost ride, steer through the stud trails and avoid obstacles; this is a travel sequence, not a fight.

At the observatory, use Human Torch to melt the ice around the central structure and nearby loose pieces. Assemble an electrical transformer. Charge Thor's hammer using the indicated special

action, then transfer the charge into the transformer. Once the exit opens, cross the bridge and defeat the displayed group of 20 Frost Giants.

Loki blocks the far end. Approach with one hero; when Loki traps that character, switch to another and hit him. Melt the ice on the gate with Human Torch, then target the revealed cracks with Thor's hammer to break through. Melting the ice exposes the real obstacle rather than completing the entire gate puzzle.

2. Open the route through the city

The frozen stairs initially keep the non-flying heroes below. Fly one character up to Loki, allow him to become the target of Loki's spell, then switch to the other flyer and strike. Loki's retreat destroys nearby pillars. Break up their remains and build the ramp for the rest of the team.

Wolverine reveals the climbing wall on the right and uses the claw switch at the top. Thor enters the opened chamber and charges the electrical device to open the onward route.

Melt the large gold statue with Human Torch. Build its pieces into a shield switch and activate it with Cap. Use the revealed turntable to raise the stairs. At the next Loki encounter, repeat the switch-character counter to his spell.

Wolverine now reveals a dig spot and excavates the pieces for a claw switch. Build and activate it to expose the transformer above the lift. Fly Thor up, charge it and bring the group to the upper level.

3. Use the statue and fountain to reach the palace

At the upper level, use Wolverine's senses to reveal the weak point in the large statue. Thor throws his hammer at the cracks. Human Torch then melts the fallen golden head, producing parts for a fountain.

Assemble the fountain. Its water grows large flowers that act as bouncing platforms. Jump onto them and hold the jump action to reach the doorway above. Inside, Loki creates several copies of himself. Use Wolverine's senses to identify the real one, approach him and switch characters when he traps your active hero. Hit him with the free character.

Build the fallen chandelier pieces into a shield switch. Cap activates it to open the throne-room entrance. Before proceeding, remember the role of each teammate: Wolverine reveals hidden targets, Thor supplies electricity and heavy hammer strikes, Torch melts ice and gold, and Cap operates shield mechanisms. The final fight combines all four roles.

4. Break the Destroyer's protection

Loki controls the Destroyer from his raised position. Avoid the robot's fire attacks and the burning patches they leave while clearing room to build. Melt the ice covering the loose pieces and construct a shield-deflection pad.

Stand Cap on the pad with his shield raised. When the Destroyer fires its continuous beam, reflect it into Loki. Aim at the controller rather than the robot. Once Loki is stunned, switch to Thor, approach the marked point beside the Destroyer and perform the prompted attack.

The pad is lost between phases. Melt the next ice-covered pieces, build the replacement pad and repeat the beam reflection and Thor strike. Complete three cycles in total to break the Destroyer. If

Thor cannot hurt it, check whether Loki has actually been hit by the reflected beam; the robot is protected until that interruption occurs.

5. Expose the real Loki

After the Destroyer falls, Loki returns to his illusion trick. Move Wolverine into the group of copies and use his senses. Once the real Loki is identified, approach him. If Wolverine is caught by the spell, switch to another hero and strike Loki while he is occupied.

That final attack ends the battle and allows the team to recover the Tesseract. Do not keep attacking every copy at random: the sense interaction is the intended way to identify the target. The same character-switch solution used on the bridge remains the answer here.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area's detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge's reward may appear later than another numbered minikit.

Minikit 1: Bifrost tunnel

During the opening high-speed journey, follow the rings of studs and hold towards the upper-left near the end of the tunnel. Steer through the floating canister. If you miss it, make a separate replay of the opening rather than searching the observatory for it.

Minikit 2: Observatory: behind the sword

Melt the ice surrounding the central sword mechanism with Human Torch. Walk around behind the central structure and jump into the concealed minikit before taking the bridge exit.

Minikit 3: Observatory: gold eye

On the right is a chest with a web handle. Pull it open with Spider-Man. A gold eye-shaped object emerges; melt it with Human Torch or Mark 42 to release the minikit.

Stan Lee in Peril

In the observatory's circular sword room, inspect the rear-left/back wall for the silver wheel and wreckage trapping Stan. Use Iron Man's missiles to destroy the silver pieces and wait for the rescue confirmation. Do this before heading onto the rainbow bridge.

Minikit 4: Rainbow bridge: magnetic statue

At the far end of the bridge, inspect the statue on the right with blue-metal armour. Use Magneto to pull its metal pieces apart and collect the minikit.

Minikit 5: Rainbow bridge: silver statue

On the opposite side, missile the silver armour on the other statue. Pull the newly exposed web attachment with Spider-Man to bring the structure down and reveal its minikit.

Minikit 6: City: three frozen plants

Melt the ice around three plants: one left of the early city encounter with Loki, one left of the large powered gate, and one by the flowerbed just in front/right of that same gate. Check that each plant's ice is fully removed.

Minikit 7: City: frozen fountain reward

Near the first frozen plant, fly up to the circular stone structure on the left. Missile its silver cap and charge the transformer below it. Use Jean Grey on the purple-highlighted frozen object, then melt its remaining ice with Human Torch and collect the minikit.

Minikit 8: City: garden dig spot

By the large gate with a generator above it, inspect the grassy flowerbed on the right. Smash the plants, dig with Wolverine and build the uncovered pieces into the minikit.

Minikit 9: Side temple: Infinity Gauntlet

Fly over the ice blocking the side bridge. Explode the silver object on the left, build and turn its crank. Smash the right-hand debris and build the second statue. When the gate drops pieces, build green handles and pull with Hulk. Build the gauntlet and animate it with Jean Grey.

Minikit 10: Throne room: three gold statues

Melt the three gold statues during the Destroyer fight. Two are on the left side and one on the right. The statue near Loki is safest to reach while the Destroyer is stunned; collect it during that opening before finishing the encounter.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 95,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
