09. Doctor in the House

Full story and 100% mission walkthrough

True Believer target: 110,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Mister Fantastic, Invisible Woman, Human Torch and Thing handle the story. Add Iron Man Mark 42 for missiles and flight, Magneto for the comm-tower metal, Jean Grey for mind control, Thor for electricity, Wolverine for digging and Spider-Man for senses and web handles.

Route warning: The first minikit is in the opening dive. Complete the five gold statues in the first castle section before crossing to the second. Start the three-banner challenge at the entrance of the second section; two banners alone are not enough.

Reaching True Believer

Follow the opening dive's stud rings, then explore both castle sections. Smash crates around the gold statues and rebuild the five wall masks for extra studs. Use 110,000 as the target, rather than the lower figure found in some older lists.

You need 110,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 55,000 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Mister Fantastic, Invisible Woman and Thing; Human Torch and Nick Fury rejoin later

Goal: Cross Doctor Doom's castle, reunite the team and defeat Green Goblin.

1. Launch the Fantasticar

Follow the Manhattan marker into Central Park. At the fountain, Invisible Woman uses telekinesis on the vendor's container to release pieces. Build a Fantastic Four pad, use it with Reed and board the Fantasticar that appears.

During the descent over Latveria, steer through the studs and toward the minikit within the blue-stud ring if you can reach it. Once you land, the group is separated; begin with the characters

available on the castle walls. Thing handles heavy objects, Reed stretches and uses computers, and Sue moves psychic objects, turns invisible and reflects beams with her force field.

2. Activate the first energy bridges

Pull the starting grapple attachment with Reed and use Sue to stack the released platforms into steps. Thing throws a green-handled container at the cracked tower wall. Reed stretches to the revealed attachment and operates the mechanism that lowers a ladder.

Climb with Sue, stand on the shield pad and raise her force field. Reflect the beam into the circular receiver across the gap to activate an energy bridge. Cross and have Thing pull the next green handles. Build a Fantastic Four pad and use Reed's transformation to expose a computer. Select the red X on its display to disable the communications jammer and open the next crossing.

Break the next cracked wall with Thing. Sue places the three blocks into the marked positions to form another staircase. Climb together; a glowing bridge must be activated before the ground-bound members of the team can use it.

3. Pass the security tower

At the upper security area, Reed stretches to the platform above and clears the Doombots and obstruction. Sue turns invisible to pass the scanner below and releases the container's pieces. Return to Reed, build the turntable from those pieces and push it to shut down the barrier.

Thing breaks the next cracked wall. Sue moves the object covering Reed's grate; send Reed through, then glide him across the gap. Pull the attachment, build the Fantastic Four pad and transform to power the next route.

In the following courtyard, break the cracked wall and cloak Sue into the control room. Defeat the guard and use telekinesis to unplug the large cable, disabling the security. Reed uses the console to restore the bridge. Cross, pull down the ladder and climb to the large central platform.

4. Reunite the Fantastic Four and reach Fury

Thing picks up the heavy crate and throws it at the cracked structure across the gap. The resulting laser destroys scenery that supplies a shield pad. Build it and have Sue reflect the beam into the receiver to the left, activating the bridge to Human Torch.

Cross and switch control to Human Torch so the reunion registers. Thing removes the green-handled obstruction nearby to reveal a ladder. Climb and switch to Nick Fury when you reach him.

Human Torch melts the gold covering at the laser mechanism. Sue rotates the cannon with telekinesis; use its lever to fire at the castle wall. Enter the opening, pull the interior grapple to call the lift and defeat the Doombots. Melt the gold barrier blocking the elevator, get Thing aboard and ride up to the throne room. The important checkpoint is actual control of each rescued character, not simply standing next to them.

5. Ground Green Goblin three times

Fight the Doombots while avoiding Goblin's bombs. Each round produces a different build from the broken windows.

First, assemble the heavy green-handled object. Thing lifts it and throws it at Goblin when he pauses, knocking him off the glider. Run in and attack while he is on the ground.

Second, defeat the next wave and build the giant racket from the new window debris. Sue uses telekinesis to swing it and bring Goblin down. Follow up with another close-range attack.

Third, build the Fantastic Four pad from the final pieces. Reed transforms into the control-tower mechanism and forces the glider down. Attack Goblin again to finish the mission.

The three solutions deliberately rotate through the main team's abilities. If the glider seems invulnerable, inspect the newest brick pile instead of shooting at it continuously. Build only after making enough space to finish the interaction safely.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Skydive

As the Fantastic Four drop towards Castle Doom, steer through the central line of stud rings. Collect the minikit near the end of the descent. If missed, replay the opening; it is not sitting on a later castle platform.

Minikit 2: First castle section: five gold statues

Melt the statue behind crates beside the start, the one above/behind the first cracked wall, and the one in front of the communications dish. The fourth is left of the security camera area; the fifth is farther on behind a cracked wall near the section exit.

Minikit 3: Communications tower: metal tank

Once the story communications jammer is disabled, fly up to its dish. Use Magneto on the blue-metal collar/tank beside it. Open it fully and collect the minikit.

Minikit 4: Security tower: controlled Doombot

Reach the ledge above the camera-guarded area. Melt the ice covering the rear glass-fronted room. Jean Grey can then mind-control the Doombot inside. Walk or jump it into the minikit; breaking the glass is not the solution.

Minikit 5: Second castle section: three banners

Missile all three silver banner fastenings: one above the entrance to this section, then one on each side of the central rear tower. Each hit unfurls a Doom banner. Check for three before leaving this outdoor area.

Stan Lee in Peril

In the second outdoor castle area, before the crossing to Human Torch, descend the steps on the right to the cannon holding Stan. Use Spider-Sense and pull the revealed handle to raise the cannon. Melt its gold firing part with a heat beam so Stan is launched to safety.

Minikit 6: Second castle section: springboard

On the left mid-level platform, dig the soil with Wolverine. Build the pieces into a springboard, then bounce from it into the minikit suspended overhead.

Minikit 7: Second castle section: single gold statue

After reaching the area where Human Torch was fighting, inspect the right-hand mid-level platform. Melt its standalone gold statue. This awards its own minikit and is separate from the earlier five-statue challenge.

Minikit 8: Second castle section: upper-right generator

Reach the high platform on the right. Destroy the silver bunker panel with missiles, then charge the revealed electrical unit with Thor. Collect the minikit before dropping back down.

Minikit 9: Second castle section: five Doom masks

Melt each ice pile and build the pieces into wall decorations. Search beside the entrance, the lower-left fighting area, the mid-left platform, the mid-right wall and the upper-right generator platform. Melting alone is insufficient: finish all five builds.

Minikit 10: Central tower: layered secret room

Approach the central rear tower from the upper-right ledge. Spider-Sense reveals two handles; pull them to open the room. Inside, missile the silver barrier and melt the gold barrier behind it. Collect the final minikit before continuing to Green Goblin.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 110,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu’s exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
