# 11. Taking Liberties

Full story and 100% mission walkthrough

True Believer target: 95,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level’s comic.

**Before you begin**

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide’s route, not a separate numbering system shown by the game.

Free Play characters and abilities: Hulk, Mister Fantastic and Wolverine cover the story. Add Iron Man Mark 42 for flight, missiles and heat, Jean Grey for telekinesis, Spider-Man for pulling, Galactus for cosmic bricks, Magneto for blue metal and Iceman for freezing.

Route warning: The first two minikits are behind you to the left of the start. Complete the three purple-lidded containers before leaving the first power-plant area. The miniature Statue of Liberty needs cosmic construction, not ordinary building.

**Reaching True Believer**

Explore the optional platform left of the crash before going right. Smash machinery along the power-plant walkways and collect studs around the statue’s stairs. A flying character makes the high ledges much safer during the Free Play run.

You need 95,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 47,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

**Full story route**

Team: Hulk, Mister Fantastic and Wolverine

Goal: Cross the power plant, climb the Statue of Liberty and defeat Mastermind.

**1. Escape the crash and move Liberty's arm**

Leave the Helicarrier, follow the city marker and board the waiting jet. The Statue of Liberty throws it into the power plant. Use Hulk's repeated interaction prompt to break the team out of the wreck.

Hulk can enter the green hazardous waste. Smash the cracked obstruction to create access for the others. Send Wolverine across the platforms and up the ladder, break the yellow-cracked panel and activate the claw switch. Break the suitcase delivered by the conveyor and build a Fantastic Four pad. Reed's mousetrap transformation makes Liberty move her arm.

Hulk enters the next waste pool and pulls the green handles to bring down the tower. Wolverine senses and climbs the wall, then breaks the cracked door to reveal a console. Reed stretches up to his ledge, glides across and uses the console to raise Hulk's lift. Throw the heavy canister at the cracked target to move the statue's hand again.

**2. Get all three heroes to the elevator**

At the larger waste pool, Reed uses the control panel to bring a moving platform over for Wolverine. Carry him across, then send Reed through the grate. Hulk can wade directly through the hazardous waste.

On the far side, Hulk can open the green-handled covers and Wolverine can operate the claw switches behind them to drain the pool. This helps if you want to collect the remaining studs. To progress, put all three heroes on the red pressure pads, open the elevator and ride up.

In the next section, Hulk pulls the handles to release the first moving generator. Time your movement behind it and use Wolverine's claw switch to activate the next crossing. Avoid the electrical sweep rather than trying to run through it.

Pull the next door apart with Hulk. Wolverine reveals and climbs the wall, then uses his senses on the cylinder to cross to the upper switch. Activate it to slow the radioactive machinery for the others. Reed pulls the exit attachment to leave the plant.

**3. Climb the statue's interior**

Inside Liberty, Wolverine reveals the first climbing wall and activates the upper claw switch to bring up the lift. Reed slips through the grate, breaks the object on the far side and builds a grapple mechanism. Pull it to lower a platform for Hulk, who tears open the green-handled gate.

At the next grate, send Reed through and build the Fantastic Four pad from the nearby crate. His crane transformation moves a bridge into place. Clear the cracked rubble and keep climbing.

Reed passes through another grate and pulls the attachments that lower the next crossing. Hulk removes the gate over the ladder. Send Reed up, clear the objects and operate the upper lift mechanism so Hulk can follow.

Build the narrow bridge near the burning jet. Wolverine crosses and breaks the cracked wall to supply a Fantastic Four pad. Reed becomes a fire engine to extinguish the flames. Hulk pulls apart the jet, and Wolverine uses the final claw switch to lower the spiral stairs into the statue's head.

**4. Break Mastermind's control over Wolverine and Reed**

Mastermind turns your teammates against you in sequence. Begin by fighting the controlled Wolverine with a free hero. Dodge his leap when he climbs away; hit him while he is stuck after landing. Once his hearts are depleted, switch to Wolverine and rapidly press the interaction button to break the mental hold.

Reed is next. He wraps up one teammate, leaving the other available. Switch to the free character and attack during his vulnerable opening. Repeat until Reed can be selected, then complete his repeated-button struggle to free him.

Do not focus on the illusion enemies at the expense of the controlled teammate. The important cues are the possessed hero's health, their recovery after an attack and the moment the game lets you switch back to them for the mind-control prompt.

**5. Defeat the controlled Hulk and expose Mastermind**

Hulk's phase needs a different approach. Dodge his charges and wait for him to revert to Bruce Banner after a miss. Attack Banner during that opening. Repeat until the possession is defeated rather than trying to overpower Hulk while he is still transformed.

Finally, switch to Wolverine and use his senses among Mastermind's illusions. Locate the real villain and strike him to finish the mission. If no target appears immediately, reposition within the marked area and try the senses again after the animation settles.

**Complete Free Play collection route**

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

**Minikit 1: Crash area: silver object on the left**

Immediately fly left from the starting wreck to the otherwise unreachable lower walkway. Destroy the silver object underneath the stairs with Iron Man’s missiles and collect the minikit.

**Minikit 2: Crash area: hidden shaft**

On that same lower-left walkway, send Mister Fantastic through the grate. Once inside the shaft, switch to a flying character and rise to the top to collect the minikit and nearby studs.

**Minikit 3: First power-plant area: three purple lids**

Use Jean Grey’s telekinesis on all three purple-lidded containers. One is on the far-left platform above the first two minikits; the second is beside Mister Fantastic’s glide point midway along; the third is near the large green toxic pool at the far right.

**Minikit 4: First toxic pool: cracked wall**

As Hulk, enter the toxic waste beside the main route and smash the wall with the large green crack. Step inside the opening and explore the recess for the minikit. This detour is available to the story team.

**Minikit 5: Second power-plant area: high ledge**

On arriving after the elevator, fly up and towards the rear-left, around the back of the entrance structure. Land on the concealed upper platform and collect the minikit sitting there.

**Stan Lee in Peril**

In the second power-plant section, pass the first rotating electrical machine and find the tightrope leading towards a rear platform. Cross it with an agile hero, or fly directly there in Free Play. Smash the object pinning Stan down. His platform also contains minikit 6’s pull handle.

**Minikit 6: Stan's platform: cosmic statue**

Reach the upper side platform used for Stan's rescue, beyond the first electrical spinner. Pull the handle on the yellow-and-black wall panel with Spider-Man. Use Galactus to assemble the fallen cosmic pieces into a small Statue of Liberty and collect the reward.

**Minikit 7: Power plant: green-handled room**

Near the spinning electric column, Hulk pulls off the green-handled panel as part of opening the route. Before climbing onwards, enter the exposed space and look left of the climbable wall for the minikit.

**Minikit 8: Statue interior: magnetic chest**

After entering the Statue of Liberty, climb the first steps on the right and find the blue-metal chest on the lower level. Magneto opens it. Collect its minikit before continuing up the interior.

**Minikit 9: Statue interior: five blue signs**

Destroy the sign near the first steps, the one by the upper grate/claw-switch area, the one beside the stairs after Reed repairs the bridge, the one behind crates near the ladder and burning aircraft, and the one beside the final stairs/claw switch approaching Mastermind.

**Minikit 10: Before Mastermind: freeze and melt**

Near the top of the statue, before climbing into the boss arena, find the puddle beneath the pipe on the right. Freeze it with Iceman, then melt the block with Mark 42 and collect the final minikit.

**Final completion check**

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 95,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
