12. Rapturous Rise

Full story and 100% mission walkthrough

True Believer target: 85,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Captain America, Thing and Storm cover the story. Add Wolverine for digging and cracked walls, Iron Man Mark 42 for flight, heat and explosives, Spider-Man for senses and webs, Sandman for the beach panel, Jean Grey for telekinesis, Mister Fantastic for the bunker grate, Magneto for blue metal and Iceman for Stan's flames.

Route warning: The jungle has five gold eggs and four red luggage pieces. The final compound has five buried pumpkins, which must be dug up and destroyed. These are three distinct challenges, not a single running counter.

Reaching True Believer

The beach, plane wreck and bunker detours offer substantial breakable scenery. Collect the stud trail from the crab and clear crates near the plane. Finish collecting before the final Rhino/Magneto sequence prevents easy backtracking.

You need 85,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 42,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Captain America and Thing; Storm joins near the final compound

Goal: Cross the island, defeat Rhino and confront the apparent Magneto.

1. Reach the island and free Thing

From the Helicarrier, descend into Manhattan and follow the guide route to the waiting jet. Board as Captain America to begin the island mission.

Thing lands buried in sand. Use Cap to destroy the nearby vegetation, including the highlighted plants above, and assemble a pump. Jump on it repeatedly to free him. Fight the arriving enemies, then Thing breaks the cracked rock wall on the right.

Advance with Cap's shield raised to reflect the turret's projectiles back at it. Thing throws the nearby heavy rock or turret remains at the cracked wall beneath the electrical barrier. Cap activates the revealed shield switch to shut the barrier down.

Reflect the next turrets' fire, clear the guards and remove the plants concealing green handles on the right. Thing pulls the cliff section apart. Build and push the turntable to raise a bridge across the waterfall.

2. Cross the wreck and jungle

Across the bridge, deal with the turret and send Cap over the gap using the pole. Break the foliage covering the shield switch and activate it so Thing can follow. Climb the vine, defeat the guards and throw the shield at the crane's base to make a ramp. Thing tears open the green-handled door at the top.

In the jungle, clear the plants from the fallen log and pull its handles. Defeat the raptors, then lift the plane cockpit out of the way. Cap returns up the slope, swings across the poles and crosses the burning fuselage with his shield raised. Pull the lever inside to inflate the slide for Thing.

Break the crates outside, build the green handles on the wreckage and pull it apart. In the next clearing, destroy the objects and build the jet-powered cart. Ride it into the rock wall to open the onward path.

3. Open the guarded bridge

At the locked bridge, Cap uses the rail or pipe underneath to cross hand-over-hand. On the far side, keep his shield raised to return the turrets' shots, then clear the guards and pull the gate lever. Thing can now cross.

Pull the next green handles and defeat the enemies in the enclosed area. Thing digs up or lifts a rock and throws it at the cracked wall above. Climb to the revealed pieces, build a shield switch and activate it with Cap to remove the next energy fence.

Storm joins beyond this section. Clear the enemies and break through the concealed cracked wall. Build the transformer from its pieces and charge it with Storm. In the following area, clear the debris over the shield pad. Cap stands on it and reflects both laser beams back into their cannons. Build another transformer from the wreckage, charge it with Storm and enter the boss arena.

4. Make Rhino charge the pumpkin

Rhino repeatedly charges across the arena. Keep moving out of his line while breaking the orange-brown plants and objects in the centre. Build the resulting pieces into a large pumpkin.

Position your character so Rhino's next straight charge takes him into the pumpkin, then dodge aside. Once he is stunned, switch to Thing, approach and follow the prompted attack sequence. This removes Rhino and begins the next encounter.

Build the pumpkin during Rhino's recovery after a missed charge. Ordinary attacks cannot replace the trap.

5. Return the metal projectiles

The apparent Magneto attacks from above using large metal objects. Avoid the slams and wait for an object to break into buildable pieces. Assemble the green-handled projectile and let Thing throw it at the hovering opponent's metal defence.

When the impact knocks him down, run in and attack before he rises again. Repeat with the next construct, including the alarm-clock-shaped object, and complete the third round in the same way.

Repeat the dodge, build, throw and grounded attack cycle until the encounter ends.

The cutscene reveals that this opponent was Mystique while the real Magneto's base rises into orbit. Continue through it to finish the level.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Beach: buried crab

At the starting beach, inspect the three dig spots grouped to the left. Dig all three with Wolverine, build the recovered pieces into a crab and follow it towards the sea along its stud trail. Collect the minikit it leaves.

Minikit 2: Beach: sand palm tree

Near the rock wall behind the starting area, melt the gold statue. Break the cracked wall it reveals and build the sand panel from the pieces. Use Sandman to grow a palm tree; collect the minikit released by its coconut.

Minikit 3: Beyond the first electric gate

Once Cap has disabled the first barrier, look among the trees at the back-left of the clearing. Use Spider-Sense to reveal the handle on the vehicle caught in a tree. Pull it down with webs to release the minikit.

Minikit 4: Beach exit: gold door

At the wreck/crane structure near the end of the first section, inspect the area below the strong-handle story route. Cut through the gold door with Mark 42 and collect the minikit before entering the jungle.

Minikit 5: Plane wreck: silver tail panel

At the crash site, missile the silver panel sealing the tail of the aircraft. Put out the flames inside with Iceman or Storm, then enter the wreck and collect the minikit.

Stan Lee in Peril

At the plane crash site, inspect the elevated ledge to the left of the route out. Stan is surrounded by fire. Aim Iceman’s cold beam at every patch around him until the rescue registers. Collect the nearby red luggage piece while on this ledge.

Minikit 6: Jungle: five gold eggs

Melt the egg left of the first jungle checkpoint, the one on the upper ledge by the S.H.I.E.L.D. crates/fire at the crash, the one under the gorilla near the buildable engine, the one against the wall beyond the strong handles, and the one by the final electric gate/bunker.

Minikit 7: Jungle: four red luggage pieces

Smash the case on the low path as you enter, the one behind the plane's tail, the one on the raised ledge near Stan and the crash-site exit, and the final case on the bunker-side ledge at the end of the jungle. Clear nearby plants to see them.

Minikit 8: Jungle exit: bunker grate

At the last bunker/electric-gate area, use Jean Grey on the large highlighted plants on the left wall. Build the loose pieces into a grate. Send Mister Fantastic through and collect the minikit inside the bunker.

Minikit 9: Compound: magnetic tower statue

At the beginning of the final section, look above the first generator/gate. Use Magneto on the blue-metal statue mounted high on the structure. Pull it apart and collect its minikit before advancing.

Minikit 10: Compound: five pumpkins

Dig and destroy five pumpkins: left of the first powered gate; right of that gate; beside the cannon/shield-deflection position after the first wall; right of the entrance to Rhino's arena; and in the arena's far back-left corner. Digging alone does not finish the challenge.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 85,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
