13. Magnetic Personality

Full story and 100% mission walkthrough

True Believer target: 100,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Iron Man Mark 42, Thor and Spider-Man cover the story. Add Jean Grey for telekinesis and mind control, Magneto for blue metal, Galactus for cosmic bricks, Hulk for strength, Iceman for fire and ice, Wolverine for claws and digging, and Mister Fantastic for the grate.

Route warning: There are four minikits in the landing bay. Complete them before leaving it. In the next area, the blue wall opens a room with two separate minikits: one from the puddle and one from the climbing route.

Reaching True Believer

Clear the landing bay's crates and tank stacks, then search the side chambers in the space station. The opening room's enemy pressure can cause repeated stud losses, so reduce nearby enemies before attempting its optional puzzles.

You need 100,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 50,000 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Iron Man Mark 42, Thor and Spider-Man

Goal: Enter Asteroid M's control room and defeat the real Magneto.

1. Launch from Central Park

Follow the mission route to the lake in Central Park. Use Spider-Sense at the dock to reveal the hidden console, then operate it with Iron Man. Rotate the three sections so their coloured connections match the central pattern. Board the Stark jet once the route opens.

This roster is the same useful combination used aboard the tanker: Spider-Man reveals and pulls, Iron Man destroys silver LEGO and operates computers, and Thor breaks special cracks and

supplies electricity. Keep those roles in mind as the space station presents them in quick succession.

2. Open the hangar exit

Fight enough of the arriving guards to make room near the right-hand tower. Spider-Man reveals its web handles and pulls away the obstruction. Iron Man destroys the silver panel behind it, and Thor charges the transformer.

On the opposite side, destroy the other silver panel and charge the second transformer. Break or collect the released pieces and build the large turntable in the middle. Push it to open the floor hatch; the decompression breaks the blocked exit. Wait for the sequence to finish, then take the corridor into the station.

The two towers each contribute to the final mechanism. If the turntable cannot be built, revisit the other side and check that its electrical charge has registered. Clearing every enemy is less useful than finishing those two devices.

3. Pass the broken bridge and sealed door

In the next room, break the containers near the enemy-entry tube and build a stopper to reduce the stream of attackers. Cross the missing bridge using flight or Spider-Man's swinging ability.

At the glass wall, Spider-Sense reveals a cracked section for Thor. Break it, then pull the attachment inside with Spider-Man. Build the large device from the pieces that fall through the pipe and charge it with Thor to remove the obstruction.

Reveal the next climbing wall with Spider-Man and climb toward the large locked door. Destroy the silver obstruction on the right with Iron Man and build the missing switch access. Put Thor and Iron Man on the two hanging bars, one on each side of the door, at the same time.

Leave them there and switch to Spider-Man. Reveal and pull the web handles behind the released locks to open the door. Do not assign Spider-Man to a hanging bar: he needs to remain free for the final pull.

4. Align the control-room exit

Inside the rotating control room, fight the guards and pull the twin handles at the central console platform. Iron Man uses the raised console to rotate the connecting corridor until the route is aligned on the right. Cross the new walkway and enter the tube leading to Magneto.

Before leaving, Iron Man can rescue Stan Lee by destroying the silver ceiling panel in this room. In the opening hangar, destroying the three stacks of cylindrical tanks is another Story Mode collectible task. The more elaborate magnetic, cosmic and claw-switch objects are for a later Free Play visit.

5. Break Magneto's giant metal defence

Magneto surrounds himself with a huge magnetic form and attacks while minions interfere. Dodge the thrown objects until enough pieces have landed to build a large iron. Use Iron Man at the interaction marker to launch it. When Magneto drops to the ground, rush in and attack.

During the second round, avoid the attacks and assemble the next pile into a giant pumpkin. Thor uses his hammer to launch it, breaking the defence again. Hit Magneto during the grounded opening.

For the last round, build the electrical device. Charge it with Thor, then switch to Spider-Man and use its attachment to swing it into Magneto. This completes the final attack and ends the mission. Each build belongs to a specific hero, so changing characters is more productive than repeating the same attack with Iron Man throughout.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area's detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge's reward may appear later than another numbered minikit.

Minikit 1: Landing bay: three tank stacks

Smash the stack of canisters up the left stairs and both stacks on the right-hand lower side of the bay. Once all three are destroyed, collect the minikit. This challenge is possible with the story characters.

Minikit 2: Landing bay: repaired wall circuit

Destroy the green container on the right. Use Jean Grey's telekinesis to place the three loose purple-highlighted panels into the wall so the connections join. When the upper hatch opens, fly up and collect its minikit.

Minikit 3: Landing bay: burning shaft

To the right of the large exit door, Hulk pulls away the green-handled panel. Extinguish the flames with Iceman, switch to a flying character and rise through the shaft to the minikit at the top.

Minikit 4: Landing bay: cosmic ride

At the rear-left, use Magneto to open the blue-metal cabinet. Use Galactus on the cosmic bricks inside to build the small ride. Mount it and allow the ride's animation to finish to receive the minikit.

Minikit 5: Space station: boulder and dig spot

Near the start of the second area, fly to the high ledge beneath the large pipe, above the suspended boulder. Wolverine activates the claw switch, dropping the boulder and exposing a dig spot below. Dig the spot to uncover the minikit.

Minikit 6: Space station: frozen puddle

Across the bridge, find the blue-metal wall near the gold-panel walkway. Open it with Magneto and charge the generator with Thor. In the newly opened side room, freeze the puddle with Iceman, then melt the block if needed to free the minikit.

Minikit 7: Same side room: climbing route

Remain in the room opened for the previous minikit. Use Spider-Sense to reveal the climbing wall, then climb it and follow the upper passage to a second minikit. These are separate collectibles even though they share an entrance.

Minikit 8: Upper tube: mind-controlled goon

At the top level, turn back towards the transparent tube containing an enemy and a minikit. Use Jean Grey to control the goon. Move and jump him into the canister; your character stays outside the tube.

Minikit 9: Upper area: grate passage

At the far right of this same section, find the narrow grate. Switch to Mister Fantastic and squeeze through into the enclosed compartment. Walk into the minikit, then return to the main route.

Stan Lee in Peril

In the circular control room with the rotating outer corridor, aim Iron Man's missiles at the large silver ceiling panel above the story handles. Destroy it to release Stan. This rescue is possible with the story Iron Man; do it before moving on to Magneto's arena.

Minikit 10: Magneto arena: three blue boxes

During the boss fight, use Magneto on the three blue-metal containers. One is on the raised left ledge, one on the raised right ledge and one at the front/lower edge near your entry position. Fly to the elevated boxes and open all three before ending the fight.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 100,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
