14. A Doom With a View

Full story and 100% mission walkthrough

True Believer target: 85,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: Spider-Man, Thing, Storm and Captain America handle the story. Add Iron Man Mark 42 for flight, heat, missiles and computers, Magneto for the metal hatch, Wolverine for digging and claw switches, Galactus for cosmic building and Iceman for convenient fire extinguishing.

Route warning: Finish the five holograms in the first room before taking its exit. The boss arena contains both the cosmic minikit and Stan's rescue; complete them before Doom's final damage phase.

Reaching True Believer

Smash the control room's equipment and collect studs across its upper platforms, then sweep the airlock chamber before the boss. Use the hologram hunt to check walls and corners that the normal route skips.

You need 85,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 42,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Spider-Man, Thing, Storm and Captain America

Goal: Traverse Asteroid M, open the airlock and defeat Doctor Doom.

1. Get the briefing

The hub begins with Reed and Sue in Manhattan. Follow the guide to a vehicle call-in point and use the Helicarrier travel option. Once aboard, use the deck control to take the lift inside and meet Nick Fury at the command-room marker. The mission itself uses a different four-character team.

On Asteroid M, clear the first enemies. Spider-Man uses his senses near the large fan and pulls its attachment to extend a platform. Cap wall-jumps up on the left and crosses the new route. Break

the object on the upper walkway, build a shield switch and activate it. Storm charges the exposed transformer to lower the next platform.

2. Complete the control-room crossing

Thing pulls the green-handled panel from the rear wall. Activate the shield switch behind it, then have Spider-Man pull the newly deployed attachment to start the laser. Build the shield pad from the resulting debris.

Cap raises his shield on the pad and directs the beam into the receiver on the right. Once charged, it brings a platform into place with enemies aboard. Defeat them and cross. Thing breaks the cracked panel at the far end; Storm charges the transformer behind it to bring down the lift.

Ride up, clear the guards and have Thing pull off the outer door. Spider-Man then pulls the inner door's handles. Both layers must be removed before the team can continue. The visible green handles are only the first half of this exit puzzle.

3. Traverse the glass corridor

Lead with Cap and reflect the turrets' shots back into them. Storm flies over the moving floor and charges the transformer on the far side to reverse the belt for the ground-bound characters.

Destroy the next turrets with Cap's shield. Spider-Sense reveals a pull attachment at the sealed passage; use it and build the shield switch from the pieces. Activate the switch to continue.

At the next moving-floor section, Storm flies across, breaks the crate, builds a transformer and charges it. Spider-Man reveals the cracks in the final hatch and Thing breaks through. Take the next room cautiously: use Cap to remove its turrets before working on the large airlock.

4. Unlock the airlock

Spider-Man reveals and climbs the wall on the left. Inside the glass enclosure, break the object and build a turntable. Push it to release the left-side locks.

Thing removes the green-handled cover on the right, revealing a wall-jump shaft. Cap climbs it and pushes the second turntable to release the remaining locks. Storm charges the central transformer, rotating the door and bringing its green handles within reach. Thing pulls it open.

During the short flight through space, steer around the debris and collect studs when safe. The sequence takes the team into Doom's chamber; there is no need to search for a separate landing point.

5. Defeat the V-Series Doombots

Clear the initial wave of 20 Doombots. Doom then sends a larger V-Series machine into the arena. Bait its charge, dodge and wait for it to become stunned. Thing attacks during this recovery and completes the prompted sequence to remove the faceplate.

Switch to Spider-Man and pull the attachment exposed where the faceplate was. Follow the prompt to swing the robot out of the arena. Repeat this method whenever another large Doombot appears later in the fight.

A normal punch from Spider-Man cannot replace Thing's opening attack, and Thing cannot finish the exposed web-handle stage. Treat the large robot as a two-character puzzle: dodge, heavy attack, then web pull.

6. Turn Doom's lasers against him

After the first large robot is defeated, Doom takes over a laser cannon. Build the shield pad in the middle of the arena and have Cap reflect the beam into the glowing rings above the weapon. Hold the beam on one ring until it breaks, then move to the next.

When the cannon is destroyed, Doom traps one hero. Switch to a free teammate and strike him. The second cycle repeats the large robot, reflected laser and exposed-Doom attack.

After the third large Doombot, Doom confronts the team directly rather than setting up another full turret phase. When he immobilises your active character, switch again and land the final hit. This completes the mission. The next story level is the Galactus finale, so Doom's defeat is not yet the end of the campaign.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Control room: remote saucer

At the start, go left behind the large pillar beside the window. Melt the gold box and use the exposed console with Iron Man. Pilot the small saucer outside the station through the floating minikit to collect it.

Minikit 2: Control room: five holograms

Destroy the Magneto displays high by the rear window, low to the left of the large fan, high to its right, on the far-right wall, and left of the exit door. Use a ranged character and check the counter rather than attacking unrelated screens.

Minikit 3: Control room: flames above the device

As the main route moves right and the large electrical machine becomes active, climb the nearby ladder or fly to the platform above it. Extinguish the fire with Iceman, Storm or Cap’s shield and collect the minikit.

Minikit 4: Control room: silver doorway

Continue until enemies emerge and the floating bridge becomes available. The doorway behind them closes with a silver panel. Blow it open with Iron Man’s missiles, then fly inside the exposed recess to collect the minikit.

Minikit 5: Control room: magnetic exit hatch

At the upper exit platform, inspect the left-hand wall for a blue-metal hatch. Use Magneto to remove it. Fly into the opening and collect the minikit before leaving through the story door.

Minikit 6: Airlock chamber: top of the climbing wall

After the moving glass corridors, reach the room with the huge circular door. Reveal the left-side climbing wall with Spider-Sense and follow it to the enclosed room at the very top. Collect the minikit before descending.

Minikit 7: Airlock chamber: green handles

On the lower-left side of this room, use Thing or Hulk to pull away the green-handled hatch. Enter the revealed compartment and collect the minikit. Opening the large circular story door does not award this one.

Minikit 8: Airlock chamber: dig spot

On the opposite, far-right side of the chamber, use Wolverine to dig the soil patch. Collect the minikit from the excavation before taking the final exit.

Minikit 9: Airlock chamber: gold statue

Cut through the gold wall beside the climbing route with Mark 42. Build the released pieces into a gold statue, then melt that statue with the heat beam. Collect the reward; merely opening the wall is not enough.

Minikit 10: Doom arena: cosmic washing machine

During the final encounter, missile the silver panel above the doorway on the left. Use Galactus to build the cosmic pieces into a washing machine. Let its animation finish and collect the minikit before defeating Doom.

Stan Lee in Peril

On the right side of Doom's arena, activate the claw switch with Wolverine. Build the dropped pieces into the console/teleportation apparatus, then use the console with Iron Man or another smart character. Wait for Stan to appear and for the rescue confirmation.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 85,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
