15. The Good, the Bad and the Hungry

Full story and 100% mission walkthrough

True Believer target: 75,000 studs.

Completion requirements: finish the story, achieve True Believer, collect all 10 minikits and rescue Stan Lee. These award four Gold Bricks in total: one for each requirement, with one brick for the complete minikit set. All ten minikits also complete this level's comic.

Before you begin

This guide covers the original LEGO Marvel Super Heroes console/PC campaign. Play the story route first, then return in Free Play for a complete collection run. Finish the campaign and unlock or purchase the additional characters you need before attempting every detour. The numbered minikits below identify this guide's route, not a separate numbering system shown by the game.

Free Play characters and abilities: For the full Free Play sweep, have Iron Man Mark 42 for heat, flight and consoles; Wolverine for digging and claws; Magneto for blue metal; Hulk for cracked surfaces; Thor for electricity; Iceman for fire and freezing; and Sandman for Stan's rescue. Keep the mission's assigned heroes available for story mechanisms.

Route warning: The three-blue-container challenge spans both turbine sections: one container is in the first and two are in the second. Do not leave the first section without opening its container. Finish the bow-deck collectibles before completing the globe that ends the game.

Reaching True Believer

Clear each deck section's crates and collect stud trails while repairing the Helicarrier. Do the optional puzzles before advancing to the next team. The target is relatively low, but deaths and missed side platforms can still leave the meter short.

You need 75,000 studs in a single visit to this mission; totals from separate attempts do not add together. Smash scenery, follow stud trails and recover dropped studs promptly after a death. Enabled stud-multiplier extras count towards the meter: with only x2 active, 37,500 ordinary stud value reaches this target. Check that the True Believer banner has appeared before ending or saving your run. You can earn it in Story Mode or Free Play.

Full story route

Team: Four successive squads of heroes and villains

Goal: Protect the Helicarrier, open a portal and lure Galactus into it.

1. Recruit the villains

Leave the Helicarrier and follow the guide to Central Park to meet Magneto and Abomination. Continue with them to Doctor Doom's vehicle. Magneto removes the magnetic police clamp, allowing the team to board and return to the Helicarrier for the finale.

The battle uses four separate squads. Your task is to solve the current deck's machinery, after which the game hands control to the next group. You do not need to bring all sixteen characters to the same position or find a way to return to the previous deck.

The squads are: Thing, Green Goblin, Spider-Man and Mystique; Iron Man, Abomination, Human Torch and Venom; Captain America, Mister Fantastic, Nick Fury and Doctor Octopus; then Magneto, Doctor Doom, Storm and Cyclops.

2. Survive while working

Galactus can interrupt construction with falling debris, energy attacks and violent shaking. Move sideways out of his sweeping straight-line beam and follow the repeated-button prompt when he tries to suck the team toward his mouth. Do not continue holding the build action if the game has changed to a survival prompt.

After an interruption, return to the last incomplete mechanism. A shake or forced pause does not necessarily mean the puzzle has reset. Work from the nearest clearly marked silver object, green handle or buildable pile, and use the character with the matching ability. This level is an extended environmental boss fight rather than a conventional attack on a health bar.

3. Port turbine: clear and raise the rotor

With the first squad, Thing picks up the green-handled object and throws it at the cracked obstruction in the turbine. Green Goblin's pumpkin bombs destroy the silver debris blocking the blades.

When the jet crashes beside the rotor, Thing grabs its green handles and throws it away. Build the exposed pieces into an attachment, then have Spider-Man pull it to reveal the computer. Mystique operates the console to raise the rotor assembly.

Spider-Man now uses Spider-Sense beside the turbine to reveal handles underneath the blades. Pull them to lift and angle the rotor toward Galactus, pushing him away from this part of the carrier. The squad changes automatically after the successful action.

If the rotor will not rise, check both types of blockage. Thing's cracked-wall attack does not remove the silver debris, and Goblin's explosives do not replace the heavy throw.

4. Starboard turbine: repeat with a different team

The second squad has different abilities for a similar problem. Use Iron Man's heat beam on the gold obstruction on the left and remove any silver cover with his missiles. Operate the revealed console to raise the rotor.

Clear the flames near the turbine with Abomination's breath action. Remove the remaining gold obstruction on the right as needed, then move Venom to the sense marker. Use his senses to reveal the twin handles beneath the rotor and pull them, just as Spider-Man did on the previous deck.

Complete the resulting sequence as the turbine forces Galactus away again. Iron Man handles both the material obstacles and the console here; Venom supplies the hidden-handle interaction. You do not have to wait for Spider-Man to return.

5. Central deck: power and aim the portal

With the third squad, use Doctor Octopus on the helicopter's pull handles to release it. Its departure exposes a Fantastic Four pad. Reed uses the pad to become a hammer and break the nearby crate.

Build the dropped pieces into the damaged portal machinery and its controls. Reed operates the console. Rotate the coloured circuit sections until every connection is powered; work across the display and check the lit connections rather than clicking blindly.

The portal opens, but Galactus knocks the beam out of alignment. Assemble the shield pad from the new debris beside the machine. Put Cap on it, raise his shield and redirect the beam into the portal already forming in the sky. Hold it there until the sequence advances to the last squad.

The target is the portal, not Galactus's face. If nothing happens, refine the aim and maintain the beam instead of repeatedly leaving the pad.

6. Bow deck: build the globe

Use Magneto on the blue metal mechanism in the centre to expose the electrical transformer. Storm charges it, bringing up the base pieces for a large globe. Build the first section.

Use Magneto again on the remaining metal objects to the left to release another set of pieces and add them to the globe. Cyclops melts the gold objects on the left; build those pieces into the next section. On the right, Storm extinguishes the flames. Break the safe debris underneath and assemble the remaining globe pieces.

Check all four sources of parts if the globe remains incomplete: the powered central mechanism, the magnetic objects, the gold objects and the objects under the fire. Once the globe is complete, the ending sequence begins and the heroes send Galactus into the portal. That completes the main story campaign.

Complete Free Play collection route

Follow these entries alongside the story route above. Complete each area’s detours before taking its exit. For a challenge involving several objects, start at the first listed location and finish the whole set in the same replay. A challenge’s reward may appear later than another numbered minikit.

Minikit 1: Port turbine: fire patch

At the first playable turbine section, turn towards the foreground/right edge and locate the minikit surrounded by flames. Put out the fire with Iceman and collect it before starting the turbine’s final repair steps.

Minikit 2: Port turbine: claw switch

Circle to the left of the turbine, using flight if the wreckage blocks your path. Activate the claw switch with Wolverine and collect the minikit it releases.

Minikit 3: Both turbines: three blue containers

Open the blue-metal container at the far right of the first turbine section with Magneto. After the story switches to the second turbine, open the container on its left and the one on its far right. The third opened container completes this challenge.

Minikit 4: Starboard turbine: metal floor panel

In the second turbine section, go around the rotor to the right-hand side. Use Magneto on the separate blue-metal floor plate, near the containers. Lift it to expose the minikit underneath; this plate is not one of the three challenge containers.

Minikit 5: Central deck: dig spot

In the third playable section, where the helicopter and portal machinery are located, move towards the foreground edge. Dig the soil with Wolverine and build the recovered pieces into the minikit.

Minikit 6: Central deck: cracked floor

On the left side of the same deck, find the large cracked surface among the wreckage. Use Hulk's ground-pound to break it and collect the minikit beneath. Ordinary punches from a small hero will not open it.

Minikit 7: Central deck: electrical unit

Free or move the helicopter as the story requires, then inspect the back of this deck, left of the gold wall. Charge the transformer with Thor. A crate drops and breaks open; collect its minikit before continuing the portal sequence.

Minikit 8: Central deck: gold wall

Near that electrical unit and the helicopter, use Mark 42's heat beam to cut through the gold wall/panel. Collect the minikit in the recess. This is separate from the minikit delivered by the powered transformer.

Minikit 9: Bow deck: cleaning robot

In the final section, use the console at the front-right with Iron Man. Drive the small cleaning robot over every oil spill on the deck until the minikit is awarded. Check the floor for an untouched patch if the reward does not appear.

Stan Lee in Peril

On the final bow deck, move towards Galactus and then left to the crashed jet holding Stan. Use Sandman on the nearby sand panel. His giant boot kicks the aircraft and lets Stan eject. Wait for the rescue confirmation before finishing the globe.

Minikit 10: Bow deck: ice hammer

At the back-right near the S.H.I.E.L.D. crate, freeze the puddle with Iceman. It forms an ice hammer that smashes the crate and reveals the last minikit. Collect it before completing the large globe in the centre.

Final completion check

Before the final boss hit or exit, confirm 10/10 minikits and the Stan Lee rescue message. Confirm the 75,000-stud True Believer target has registered, either on this run or an earlier saved run. Finish the mission if you still need its story-completion Gold Brick.

If the story is already complete, use the pause menu's exit/return option and choose Save and Exit to keep new collectibles. Wait for saving to finish. Previously collected minikits are replaced by studs on later visits, so check the saved counter instead of expecting every canister to remain visible. If a multi-object challenge is incomplete, finish it before leaving.

These checks complete this story mission. There are no Deadpool red bricks or separate Free Play character-token hunts in these 15 main story levels. Bonus missions, Manhattan activities, character purchases and other hub collectibles are separate requirements for 100% of the entire game.
